

EEAST want to offer the opportunity to staff members in Mid-South Essex or Norfolk & Waveney ICS to take part in a quality improvement training collaboration.

The **EEAST QI team and Integrated Care 24** (IC24 - our out-of-hours care partner in these areas) will provide joint training to staff to upskill 12 candidates to deliver operational improvements that benefit both organisations and support innovative ideas in your locality.

### IC24 QI Training Collaboration

[EEAST and IC24 QI Collaboration](#)

We are looking for six EEAST candidates, with two already in place from the ECAT desks in Norwich and Chelmsford. That doesn't mean others from this domain can't apply!

Support from Head of Operations has been requested, to provide lieu time or similar support, for the **four face-to-face training days** and to share and test your ideas with colleagues as appropriate.

You will still need to speak to your line manager and have their support for your application.

Clinical grade is not a barrier to your application and no previous QI experience or training is required.

**You will need to be available for four workshops, two in Norfolk and two in Essex (support for mileage and expenses as per Trust policy will apply):**

- Thursday 30<sup>th</sup> March – Day 1
- Thursday 27<sup>th</sup> April – Day 2
- Wednesday 31<sup>st</sup> May – Day 3
- Thursday 27<sup>th</sup> July – Day 4 Presentations/Graduation Day

We are looking for those who have passion for change and improvement and can describe how their idea may benefit from this important and exciting collaboration.

Please follow the link to add your application **before 19:00 on 31<sup>st</sup> January**, or get in touch for further information – **Helen Hardy 07742 400164 [qi@eastamb.nhs.uk](mailto:qi@eastamb.nhs.uk)**.
