

# RIDDOR Reporting

Reporting of injuries, diseases and dangerous occurrences

Since the 6th April 2021, the process for RIDDOR reporting has been centralised, through the Health & Safety (H&S) Team.

There is an additional question added to DATIX:

**“Is this a potential RIDDOR”**

DATIX Leads must highlight potential incidents, which may meet the RIDDOR criteria, by selecting **‘YES’**.

The H&S Team will monitor the incident until a RIDDOR decision can be reached.

They will report directly to the HSE and submit the RIDDOR report.

The H&S Team have oversight of all potential RIDDOR incidents and become involved in the investigation as appropriate.

Themes can be identified earlier for intervention and prevention of staff injury.
