

In 2020, **60** requests have been made for a Stork award and **32** calls were successful, and awards provided.

Stork badges are awarded to a call handler who provides pre-arrival instructions to deliver the baby, where no critical errors have been made.

25% of the stork awards in 2020 were in very challenging environments:

post-partum bleed,
time critical babies
and a premature baby.
Excellent work!

If you are a call handler and think you have had a call that qualifies, please submit a special request form (indicating that this is potentially for a Stork Badge.)
